

How to upgrade ROM code by SD card

1. Copy the files "update1.zip" and "update.zip.dig" to the root directory of your SD Card.

2. Please make sure the battery capacity is enough and do NOT remove the battery during upgrade. Turn off your phone and insert the SD card.

3. Keep pressing the camera key then press the power key to turn on your phone. As long as you see the "recovery mode" showed on the screen, you can release camera key °

4. As you can see that recovery mode will be asking you whether you want to upgrade. Please press "**volume key**" as "up-and-down key" to move the bar to YES then press "**camera key**" as "enter key" to confirm.

5. Your phone should be going to update Rom. Please wait for several minutes and you can see the progress bar on the screen.

6. Your phone will be rebooted automatically and the startup animation will present, then you have finished your upgrade by SD card.
